

Code-Layout, Readability and Reusability

Date	26 June 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

The project follows a modular architecture with well-structured source files, meaningful naming conventions, reusable functions, and proper documentation. The implementation ensures maintainability, scalability, and ease of future enhancements.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Modular Project Structure	Code is organized into separate modules and folders	Yes	Well organized
2	Clear Naming Conventions	Variables, functions, and files use meaningful names	Yes	Easy to understand
3	Input Validation	User inputs are validated before processing	Yes	Prevents invalid data
4	Reusable Functions	Common logic is implemented using reusable functions	Yes	Improves maintainability
5	Code Documentation	Comments are included where necessary	Yes	Well documented
6	Error Handling	Exceptions are handled appropriately	Yes	Stable execution
7	Clean Code Practices	No unnecessary or duplicate code	Yes	Optimized implementation
8	Machine Learning Integration	Prediction model is properly integrated with Flask	Yes	Successfully tested

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technolog	yWhere Reused	Reusability Level (High / Medium / Low)
1	User Authentication	Python, Flask	Login & Registration High	High

2	Loan Prediction Model	Scikit-learn	Prediction Module	H
3	Input Validation	Python	Loan Application Form	H
4	Result Display Module	HTML, Flask	Prediction Result Page	M
5	User Interface Templates	HTML, CSS	Multiple Web Pages	H

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Modular and well organized
Readability	5	Easy to read and understand
Reusability	5	Components are reusable
Documentation / Comments	4	Adequate comments included
Overall Score	5	Clean, maintainable, and efficient implementation
